(Question [ITU-R 262-1/5](#))

1. Introduction:

During the 49th WP-5D meeting, Drafting Group Chair discussion on IMT applications in the entertainment sector (Section- 5.7.6) could not be finalized due to time constraints. This contribution provides the requested clarification and updates to Section- 5.7.6 for consideration at the upcoming meeting. The drafting group chair highlighted specific text in yellow, requesting further clarification from the IAFI.

2. Proposal:

In the interest of brevity, Section 5.7.6 has been merged with its associated Annexure-10 into a single, comprehensive section. As requested by the Editor, this revised document now includes a detailed clarification for each of the IMT applications mentioned in the original Section 5.7.6. All proposed revisions are marked using the track-change feature.

The updated Annexure-10 has been fully revised and now incorporates a new section: 'Case Study on the Use of IMT-2020 in Immersive Entertainment (AR/VR)'

¹ IAFI is a sector Member of ITU-R. For more details, please see <https://iafi.in>.
