THE WEEKLY NEWS SUMMARY

Telecom Stories:

Telecom Regulatory Authority of India (TRAI) believes that the coexistence between terrestrial network operators and satellite service providers in the millimetre (mmWave) band 27.5-28.5 GHz is essential for the "optimum use of airwaves" Both International Mobile Telecommunications (IMT) and satellite bands can coexist. The Satellite Earth Station Gateway (for Satcom) should be permitted to be established in the frequency range 27.5- 28.5 GHz at uninhabited or remote locations on a case-to-case basis.

Rajasthan is the first state to install L-route server for uninterrupted internet services, this move forms a part of Chief Minister Ashok Gehlot's initiative to promote e-governance. The server installed is called Bhamash State Data Center, with the Internet Corporation for assigned Names and Numbers (ICANN). This type of arrangement provides connectivity during any glitch or natural calamity in whole of Asia or India with the continuous flow of internet services without any interruption.

Delegates from India and Finland discussed possible areas of cooperation in quantum computing and a roadmap for the collaborative virtual Centre of Excellence (CoE). The meeting was held a day after signing of the Joint Declaration for setting up the Indo-Finnish Virtual Network center on Quantum computing in the Presence if the Union Minister of State (Independent Charge) Science & Technology.
